Bidders were notified that submission of the above forms should be strictly in the format shown in the tender document and should be uploaded together with the other documents.

Bidders were notified that the minutes will be uploaded to the portal once finalized.

TECHNICAL ASPECT

- The design engineer informed the bidders that the design will include an extension of the bus bar at Bamburi 132/33 kv station and a takeoff bay, a 7km line for 132kv single circuit on lattice towers and a complete metering station on the customer premise
- He clarified that the equipment must be synchronized with what Bamburi cement will adopt
- The bidders were informed that the panel at the customer premise control room will include the breaker
- The single line diagram are in the drawings
- The space in the control room was identified where the breakers will; be positioned
- The bidders were shown the cable trench route at the existing station and asked to run parallel to the existing and make proper road crossing
- The bidders were shown the transmission line trace and kplc committed t acquisition of way leaves as soon as possible
- The safety officer competence was emphasized And the bidders asked to consider both Bamburi and kplc substation safety aspects
- The bidders were asked to do civil design based on tested parameters on bearing capacity and soil conditions
- The tower legs spacing will be curtailed to 4m centers due to way leave constraints. Generic tower designs will not be accepted
- Bidders were encouraged to have objective bids and not just quote to win.
