

## **SPECIAL POWER INTERRUPTION NOTICE**

The 66kV line which runs from Embakasi Substation to Magadi through Langata and Ongata Rongai areas was built in 1989. Rapid development along the supply route has seen an increase in customer connection hence stretching the capacity of the power line. This has resulted in frequent supply interruption to our customers based in Langata, Ongata Rongai, Matasia, Kiserian and Magadi areas. The same applies to the 66kV line supplying the NSSF substation in Industrial Area.

Kenya Power intends to carry out a major rehabilitation and capacity enhancement works on the two lines for the next 3 weeks as per the program below.

The Company regrets any inconvenience that may be caused during the interruptions.
