			WARMA LEVY 5.0	1.00
			ERC Levy 3.0 cents/kwh	0.60
			REP Levy 5.00 %	2.50
			VAT 16.00 %	51.38

UNDERSTANDING YOUR PRE-PAID AND POST-PAID CHARGES

Below are the components of both the pre-paid and post-paid electricity charges which are exactly the same as per the Approval of Tariffs set by the Energy Regulatory Commission for Supply of Electrical Energy.

KENYA POWER CHARGES

Fixed Charge: This cost goes towards the billing or prepaid vending process.

Consumption: This is your electricity consumption within the billing period or prepaid vending month in kilowatt hours and shillings.

GOVERNMENT TAXES AND THIRD-PARTY LEVIES

Fuel Cost Charge: This is the money used for generation of electricity from thermal power plants. It varies monthly depending on the quantity of thermal generation and the cost of fuel.

Forex Adjustment: The foreign exchange component is related to the fluctuation of hard currencies against the Kenyan Shilling for expenditure denominated in these currencies related to the power sector (e.g. project loan repayments).

Inflation Adjustment: Varies according to the domestic and international inflation on cost of supply. It is adjusted after every six months starting from the 1st of January.

ERC Levy: Is currently set at 3 cents per kilowatt hour and is passed to the Energy Regulatory Commission (ERC) to cover its operational costs.

REP Levy: This is currently set at 5% of the cost of the units consumed and is passed to the Rural Electrification Authority (REA) for implementation of rural electrification projects.

WARMA: Is currently set at 0.05 cents per kilowatt hour and is passed to the Water Resource Management Authority (WARMA) for hydro-power generation of 1Megawatt and above. In the pre-paid token receipt WARMA levy is combined with the ERC levy.

VAT: Is currently set at 16% and is applicable to Fixed Charge, Consumption, Fuel Cost Charge and Forex Adjustment.
